

CASE STUDY

Industry / Customer type

Retail / Super Market Chain

Customer and About

Customer is a Retail Chain of Super market. started off as a single supermarket in 1987 and now a chain of over 130+ stores located across different states in South India. They become the most awarded and fastest growing supermarket chain in South India.

Problem Statement

As the business grows, the demands and requirements are also forced the IT to scale up to satisfy the requirements like Scalability, Performance, Availability, Accessibility, Improved Application response, Easy to Manage, and improvements in Turnaround time and response time.

Solution Proposed

We proposed a HCI solution to deliver the requirements like Simple deployment, Scalable, Easy to Manage, Performance with All Flash, Greater reliability, Cloud Adoption and Cloud Enabled, Scale-Out and Software-Defined and always available.

Retail / Super Market Chain

Successful Implementation

Successfully implemented the HCI Solution and moved the old Hardware to a remote location for DR purpose. Successfully data migrated by vCenter Converter.

Outcome

All applications are running in a clustered systems with high availability and the performance was boosted by the new systems. Users are felt the difference before and after the new solution implementation.

Conclusion : We can deliver Cloud Enabled, Scalable, High Performance and Highly Available solutions with data migration services
